

### Action Tower XL

Two ways to get up, two ways to get down. This "little brother" to the Action Tower XXL will put your balance and coordination to the test!

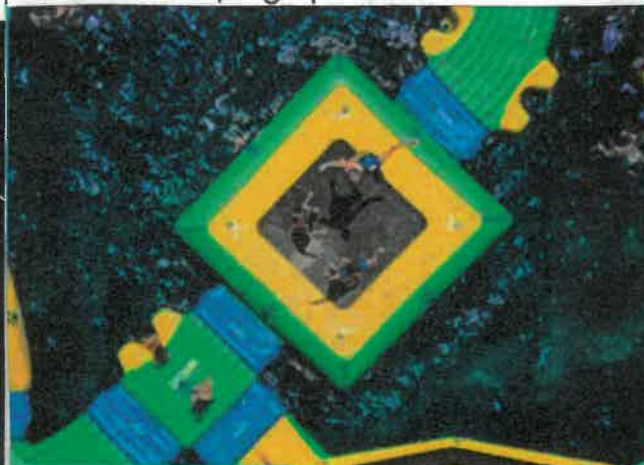

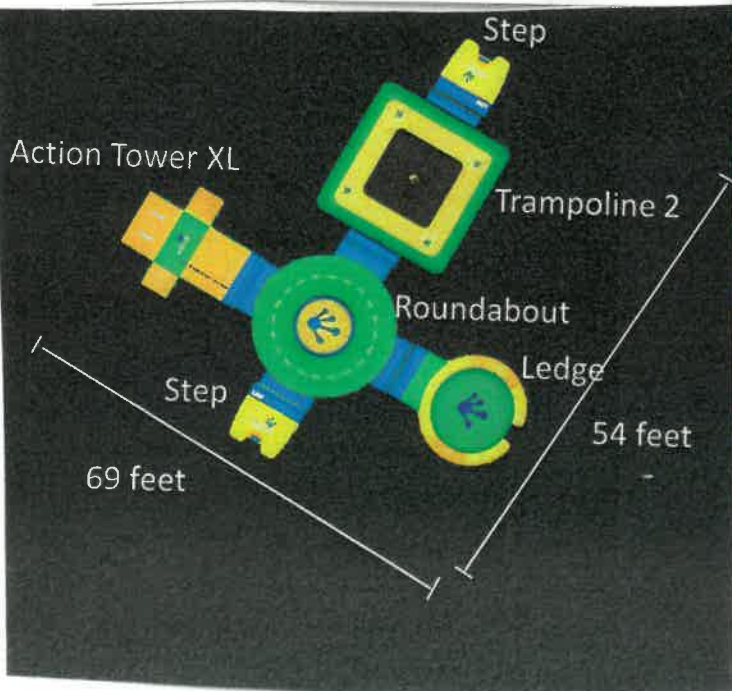

### Step

Getting on takes one Step. Its super low profile and built-in step make it quick and easy to get on components, speeding up the race and amping up the fun!

### Roundabout

Round and round we go! It's a central feature that is both a circular speedway and central meeting point for any combination. It'll link to countless configurations, creating endless routes for guests to explore!

### Trampoline 2

Jump as high as you can! The Trampoline 2 enables routes in two directions. Bounce as high as you can, somersault into the water, or just chill

### Ledge

The Ledge offers a whole new way of moving on the water - and includes 4 different levels of difficulty. Don't lean too far forward or you might fall off or, in our case, fall in!
